

Our Mission

At Enmach Industries we strive to manufacture and supply a range of products for the Recreational and Agricultural markets that will exceed our customers' needs and expectations. We endeavour to improve the quality of life of our customers and employees and to help each one achieve personal success.

Our Vision

It is our vision to be market leaders in the Recreational and Agricultural markets through the cultivation of long term relationships with our customers and suppliers, which lead to a continual cycle of growth and commitment and result in an atmosphere of ongoing improvement.

Our Values

As a company we value respect, honesty, trust, transparency and fairness which we display and look for in employees, customers and suppliers involved with our business.

We are responsible to our customers, to our valued employees and their families, and to the environment and society we inhabit, to provide quality, stability, safety and security to each and everyone's daily pathways.

WELCOME TO THE

Enmach Industries Product Guide

Welcome to our Poly Product Guide 2013, Edition 2, Valid October 2013, updating and introducing new products to our range of high quality Rotational Moulded Products.

Enmach Products are all Australian made with Australian materials by an Australian owned company. Enmach Products are manufactured from the highest quality materials resulting in products that are strong, lightweight, UV resistant and exceptionally durable to withstand the harsh nature of Australia's outback conditions.

Enmach Industries has a research and development team that understands what you, the customer wants and is constantly designing new innovative products that will serve you for a long time making everyday life easier.

Contents

POLY AGRI PRODUCTS

AG2 - AG12

POLY PRODUCT ADVANTAGES

Enmach Products are manufactured from the highest quality food grade polyethylene, conforming to Australian Standards. These products are strong, lightweight, UV resistant and exceptionally durable.

WARRANTY

All our products are guaranteed against faulty workmanship for a period of 12 months from date of purchase.

PRODUCT SPECIFICATIONS

All specifications are subject to change without notice in line with ongoing improvements.

SIZES

All sizes, measurements and capacities throughout this brochure are approximate due to the variable shrinkage nature of polyethylene during manufacture.

COLOUR

All colours shown are a guide only.

PLACING ORDERS

We have a base of approximately 1200 distributors. Contact Enmach on Freecall 1800 502 267 for your nearest distributor.

FREIGHT DETAILS

Freight free to your distributor unless otherwise specified.

PRICING AND GST

All prices specified are recommended only and are subject to change without notice. All prices include GST.

DISCLAIMER

All recommendations in this catalogue are general in nature and are intended as a guide only. All customers must make their own investigations as to whether Enmach Products are suitable for specific needs.

POLY LAWNS PRODUCTS

PRODUCTS

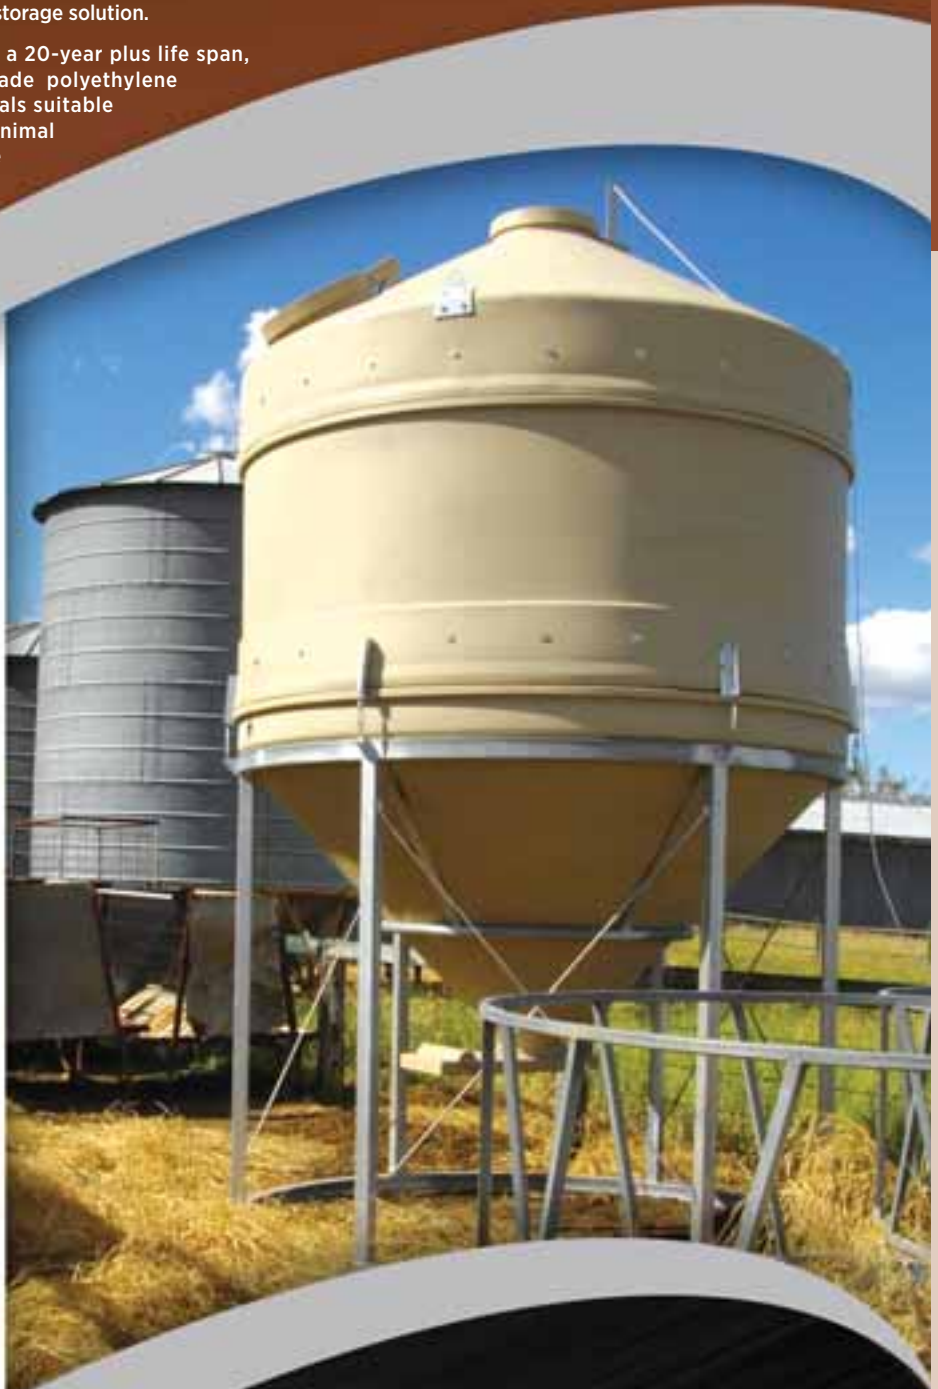

Are you looking for a better solution to your grain, fertiliser and dry goods storage? LOOK NO FURTHER!

Poly Silos can provide optimum storage solutions with their proven, safe, and easy-to-use poly products. With their incredible durability and innovative capabilities Poly Silos are a flexible and long-lasting storage option. The Poly Silo product range, which includes the Stakka Silo, Multi-feeder Silo, and the Multi Silo, are used in a diverse range of applications around Australia for storing primary products & transportation.

The Stakka Silo is ideal as an intermediate bulk container (IBC) for fertiliser storage, perfect for stock feed and grain holding, and an optimal solution for bulk storage of wet liquids and dry goods. Couple your silo with a Grainline Auger and it can be easily used by any farmer as a field feeder or field bin on the property. Poly Silos are also commonly used as containers for chemicals, material handling bins for food, and for a variety of specialty products.

Poly Silos are utilised by industry leaders in agricultural and farming sectors and in industrial manufacturing plants as the perfect storage option; now it is time for you to discover the Poly advantage for yourself. Feel secure knowing that your investments are well-protected with the long-lasting Poly Silo storage solution.

All products brought to you by Poly Silos have a 20-year plus life span, are made from UV stabilised virgin food-grade polyethylene meeting standard AS 2007:1999 plastic materials suitable for food contact use. Poly Silos produce minimal sweating and are fully weather sealed. All the storage silos are made with a galvanised steel frame fitted and are fitted with stainless-steel outlets and a remote opening lid. Poly Silos are easy clean, do not rust and are ideal for all types of product whether wet or dry.

The harsh Australian climate can have a devastating impact on the equipment we use to maintain our outdoor occupation and lifestyle. Enmach Industries has used Polyethylene to reinvent products usually made of materials such as steel, aluminum and fiberglass to extend the life of everyday items. Enmach Industries' poly products are lighter, have one of the worlds best UV protection ratings, resist rust and have compounded colour that won't fade or scratch off. Ultimately, Enmach Industries has created the poly advantage - unbeatable durability.

Enmach Industries' new and Innovative Poly Multi Silo System has revolutionized grain and fertilizer storage. Traditional Steel silos are susceptible to rust and leave no room for capacity expansion. The Poly Multi Silo offers an innovative expandable system, allowing you to grow your silo with your storage needs and give you peace of mind by removing the threat of degeneration through rusting. The poly silo bin sits in a galvanized steel frame with a stainless steel knife gate at the base of the silo and is delivered fully assembled. The Poly Multi Silo's incredible durability and innovative growth capabilities offer a flexible and long lasting storage solution.

Enmach Industries has a range of storage options available

There is the 1.6 cubic metre STAKKA SILO, the 4.3 cubic metre MULTI FEEDER and the POLY MULTI SILO system which includes the 3.5 tonne to 46 tonne silos.

SPECIFICATIONS FOR POLY RAINWATER TANKS

TANK FEATURES

- Manufactured to comply with the following standards:- AS/NZS4020, AS 2070, AS/NZS 4766
- Manufactured from UV stabilised polyethylene, tanks are tough and durable and able to withstand the harsh Australian sun
- Poly Tanks do not rust or corrode, are impact resistant and long lasting
- 10 Year Warranty
- Guaranteed one-piece tank construction ensures long term structural strength
- Food Grade polyethylene is used giving you fibre, taste and odour free drinking water

ALL TANKS SUPPLIED WITH

- Inlet strainer
- BSP Outlets
- Overflow
- Outlet strainer
- Taps (More than 2000L - 1 1/2" Outlet, 1" Gate Valve) (Less than 2000L - 3/4" Ball Valve)

TANK STAND FEATURES (To Suit PT1050)

- Strong all galvanised steel
- Fully supports tank
- 500mm High

RAINWATER TANK INSTALLATION GUIDE

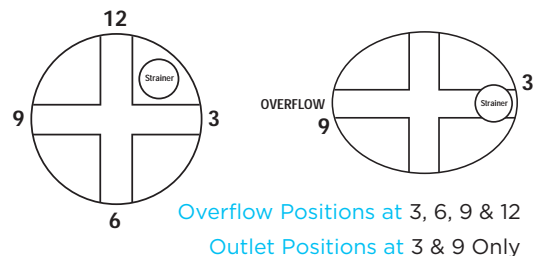

- The tank site must be flat and level, the area well compacted and free from any rocks, stones and sharp objects.
- Ensure that the prepared site is at least 600mm larger in diameter than the tank.
- A 75mm (3") base of compacted crusher dust may be used as a tank pad. A reinforced concrete slab is also acceptable and must be greater than the diameter of the tank.
- If a material other than concrete is used, a retaining wall or surround must be provided to prevent erosion.
- The overflow must be piped well clear of the tank to avoid undermining of the tank base.
- Ensure that a flexible hose of at least 300mm (12") is installed after the outlet valve to absorb any shocks or movement.

* NOTE:- FAILURE TO PROPERLY INSTALL TANK AS PER INSTRUCTIONS WILL VOID WARRANTY
